
Concept Z-2

Asset owners seek capital preservation, income generation and diversification through discretionary investment management and need an asset manager who can customize solutions to meet their investment objectives.

MetLife Investment Management Public Fixed Income provides institutional clients with the confidence to achieve their investment goals by working together from day one and through all market conditions to customize solutions to meet our clients' unique needs. We offer a bottom up, fundamental approach to public fixed income that is supported by a collaborative investment team process. Our success is driven by our deep research experience, comprehensive approach to risk management, highly accessible investment teams, with close to 25 years of industry experience on average, and nimble trading execution. These qualities have led to our success in taking active risk while consistently achieving excess returns; as evidenced by the fact that 92% of our strategies have produced a top quartile information ratio for the past 10 years.

Also, your dedicated portfolio manager will provide useful, strategic advice and your single-point client relationship manager will deliver proactive communications and high touch client service.
